TASK 3

Factorial of a number using recursion:

```swift
func factorial(of num: Int) -> Int {
    if num == 1 {
        return 1
    } else {
        return num * factorial(of:num - 1)
    }
}
let result = factorial(of: 4)
print("The factorial number is \(result)")
```
